SPLIT PERSONALITIES DoMark

A classic arcade puzzle game in which you have to reconstruct some well known faces within a given time limit. Avoid the bombs, collect the bonuses and shuffle the pieces to build some character...

BADLANDS DoMark

SPIDERMAN Empire

The web slinger returns in this specially written demo of Empire's new game (reviewed in full in the ish). Pit your wall-walking abilities against the worst of Mysterio's warped wizardry and save Mary-Jane from a fate worse than losing your new copy of Commodore Format. Gosh!

Making great computer art has never been easier than with *Saracen Paint*. Now with this powerful range of drawing tools you can make your C64 your canvas and your joystick your brush!

Don't be daunted by the concept of filled ellipses, background colours and the other 'arty' buzzwords that often make paint packages seem so confusing. Anyone can learn how to use *Saracen Paint* in a few brief minutes, and become a real pro' with just a little practice.

Saracen Paint's excellent icon and menu system helped it win one of *Commodore Format*'s coveted Corker awards when it was reviewed a mere eight months ago! Now it's yours! If you've been after a paint package then look no further! Even if you've never considered putting joystick to pixel, load *Saracen Paint* up and give it a shot. You're in for a BIG surprise!

CARNAGE

Full tape details starts on page 6

"Carnage is the ultimately addictive sports car racing game testing driving skill and nerve to their limits. One or two competitors can compete over eight unique circuits, eliminating opponents with carefully positioned high explosive devices." Well, we've bought the game, so we might as well use the blurb from the back of the original.

TECHIE TIPS STUFF

You may not understand it, you may not even know what it's all about (you do read the magazine stuck to the back of this thing, don't you?), but it's all there, ready to confound and confuse you, in classic Finch style.

THE LEGEND OF SINBAD

"Sinbad: hero for hire. Beautiful princesses rescued. Evil sultans vanquished. Dragons extinguished. Magic carpets vacuumed. That sort of thing."

But this time Sinbad may have bitten off more than he can chew in this glorious, ever-changing, very large platformer. Size of an elephant.

REAXION

Well, with a feature on puzzle games in this issue we had to have a puzzle game on the Power Pack, and just by chance one of our readers sent in this rather splendid example of the genre, just in the nick of time.

MEAN MACHINE DEMOS

CITY BOMBER

Hot off the disk drive is this exclusive demo of the up and coming Visualize blaster. Remember where you saw it first.

WIZARD'S PET

A PD classic from the vaults of the Electric Boys. A horizontal, very green shoot-'em-up that's a little bit weird. We reckon you'll love it.

FANTASY WORLD DIZZY

Don't say we never listen. We may loathe the odious little egg, but you lot have been clamouring for a Dizzy *game on the covertape for ages. So here it is. And even we'll admit, this particular adventure is pretty darned cookin'.*

PENGUIN TOWERS

Remember that corking-winning game we reviewed a few issues back? Then we said that it didn't have a UK distributor. Now it has in Jon Wells, and he's keen to show it off with the excellent fully playable demo.

COLOUR MIXING

To accompany the feature on page 26, the Electric Boys have put together this demo to show you how the C64's graphics work and how to create colours you can't normally get.

DROPZONE

Wayback in the mists of time a man who became a legend known as Archer Maclean wrote a Defender-style shoot-'em-up which many did proclaim was the greatest game written. Almost a decade later and Dropzone is still one hell of a Corker, so much so that it is being converted to virtually every console format. But many still reckon the original is the best. And now you can find out why...

MEGA FORCE

In the aftermath of a devastating war, Earth has banned the use of all arms. Conflicts must now be decided in the virtual world of Mega Force, where a Nation's champion battles for his country's survival.

You are the world's last champion – and mankind's fate is in your hands...

HARRIER

Be brave, arm your guns and get ready to take your craft close to the edge of the envelope (whatever that means). There are thrills aplenty.

SUPERSTRIKE

Blast away with this frantic shoot-'em-up. The words 'action' and 'packed' could have been invented for this game. But weren't, of course.

SPACEWAR

Remember to shoot back first: these are aliens we're dealing with here. What a great game.

DARKEST ROAD PART 2

A chilling adventure which will scare the very living pants off your body. Don't play it at night!

SAMURAI TRILOGY

This month's PowerPack holds one of the biggest covertape games we've even had on CF. Both sides of the tape are full of insanely violent hacking and slaying with a distinctly Japanese flavour, as the classic Samurai Trilogy is all about, well, Samurais, really.

As a young learner in the ways of the martial art, your journey to the higher echelons of bloodsports is a long one, fraught with danger, violence, and a mysterious abundance of plates to smash.

So when you're tired of watching John Woo films, and you've seen all the Shaw Brothers films you can stomach, why not try kicking in Bruce Lee?

To load all programs press SHIFT then hit the RUN/STOP key at the same time and you're off!

Next month: Escape from Arth comes to your powerpack.

ROAD COURSE

Billy was a warrior. A new knight of the road. He had no fear. No remorse. No sense of duty to regard the lives of pedestrians. It's a tough, tarmacked world out here, and only the fit survive the high-octane, six cylinder turbo-nightmare we choose to call simply "The A47".

SUPER PAC TWINS

If you've been keenly following the diary of a game that's been flitting around the pages of the mag of late, you'll probably want to see exactly how much of the game the Kubiszyn brothers have written so far – now's your chance.

Originally released over a year ago, *Treasure Isle* follows the fortunes of a young lad out to find an enormous stack of gold and riches, in classic text adventure style. Hutch gave it 82% when he reviewed it, it's an immensely playable game. If you'd like to get into the genre, *Treasure Isle* is a damned good start.

ESCAPE FROM ARTH

You're a spaceman running around a lonely, hostile planet trying to get back off the surface to his beloved homeworld.

LOADING YOUR POKE POWEREPACK:

To load a poke, from your Poke Powerpack first switch off your C64 for about 30 seconds to clear any previous programs from memory. Put the Poke Powerpack into your Datasette. Hold down the **SHIFT** key and press the **RUN STOP** key. Load the tape in the normal manner pressing **PLAY** on your Datasette when prompted.The screen will clear and the tape will begin to load.

After about a minute you will be presented with a menu listing of all the pokes on that side of the tape. Leave **PLAY** pressed on your Datasette. Move through the list by pressing any key to skip to the next 'page'. There are three 'pages' to view, but you can only examine them once per load, so look at the list carefully to make sure that you don't miss the poke you want! When you find the poke you want to load note the number down and move to the bottom of the list using the any key, until you see message:

ENTER THE NUMBER REQUIRED ?

Type in the number of the poke you wish to load and press **RETURN.** The poke will now automatically be loaded. If you **STOP**ped the tape you will get a **PRESS PLAY ON TAPE** message, do this and the poke will automatically load.

Again the screen will clear and the borders flash, while the right poke is found and loaded. When the tape stops this means that the poke is fully loaded (leave it for about 10 seconds just to be sure). Then **STOP** the Poke Powerpack, take it out of the Datasette, put the Game tape into the Datasette and press **RETURN.** This will bring up the message **PRESS PLAY ON TAPE,** do this and the 'Poked' game will begin loading.

When the game has loaded, **HAVE FUN, YOU'RE INVINCIBLE!**
